Re: Upcoming AT&T Installation Work in Your Community

Dear Community Members:

As a result of the tremendous growth in Internet and data usage, and our customers' desire for more and faster services, AT&T is upgrading its network in your neighborhood.

This upgrade will convert AT&T's existing infrastructure to a new state-of-the-art fiber to the home network. This investment in new infrastructure will require us to physically be on the property performing our work. It will require some digging and installation of pedestals and underground conduit at various locations.

This new network will allow for new services, faster Internet speeds, and greater reliability.

If you have any questions regarding the upgrades, please contact me at jenlewer@rowcoordinator.com. I have attached a list of frequently asked questions for you to share with the board and the residents. We look forward to bringing this exciting new state-of-the-art technology to your neighborhood.

Sincerely,

A handwritten signature in black ink, appearing to read "Jennifer Lewer", with a long horizontal flourish extending to the right.

Jennifer Lewer
ROW Coordinator/Sub-contractor AT&T Southeast
